

# Glass Door Merchandiser

## Glass Door Merchandiser

### Slide Door Models

**\* Excellent Cooling Performance**

Our products keep a stable temperature through out the unit, even under heavy use.

**\* Tasteful and Modern Appearance**

The design of our products is one of our top priorities.

Whether you have a restaurant, bar convenience store or gas station.

Turbo Air refrigerators will compliment the look of your operation.

**\* Double Pane Glass Doors with Heat Reflecting Film**

Our refrigerator doors are unique compared to other display refrigerators.

We use a double pane glass system with a layer of patented, transparent, thermal insulating film applied between the two glass layers.

Less weight means less door roller wear less overall door maintenance, and easy door operation.

**\* Hardware, Insulation and Construction**

Inside temperature is controlled automatically.

All refrigeration systems are on slide out rails to make maintenance and service easier.

Cabinet body is insulated with 100% foamed - in-place polyurethane foam insulation.

**\* Shelving**

Fully adjustable wire shelves are made of the heavy gauge metal wire with non-corrosive coating.

\*Design and specifications can be changed without prior notice for product improvement.

### \* Standard Features

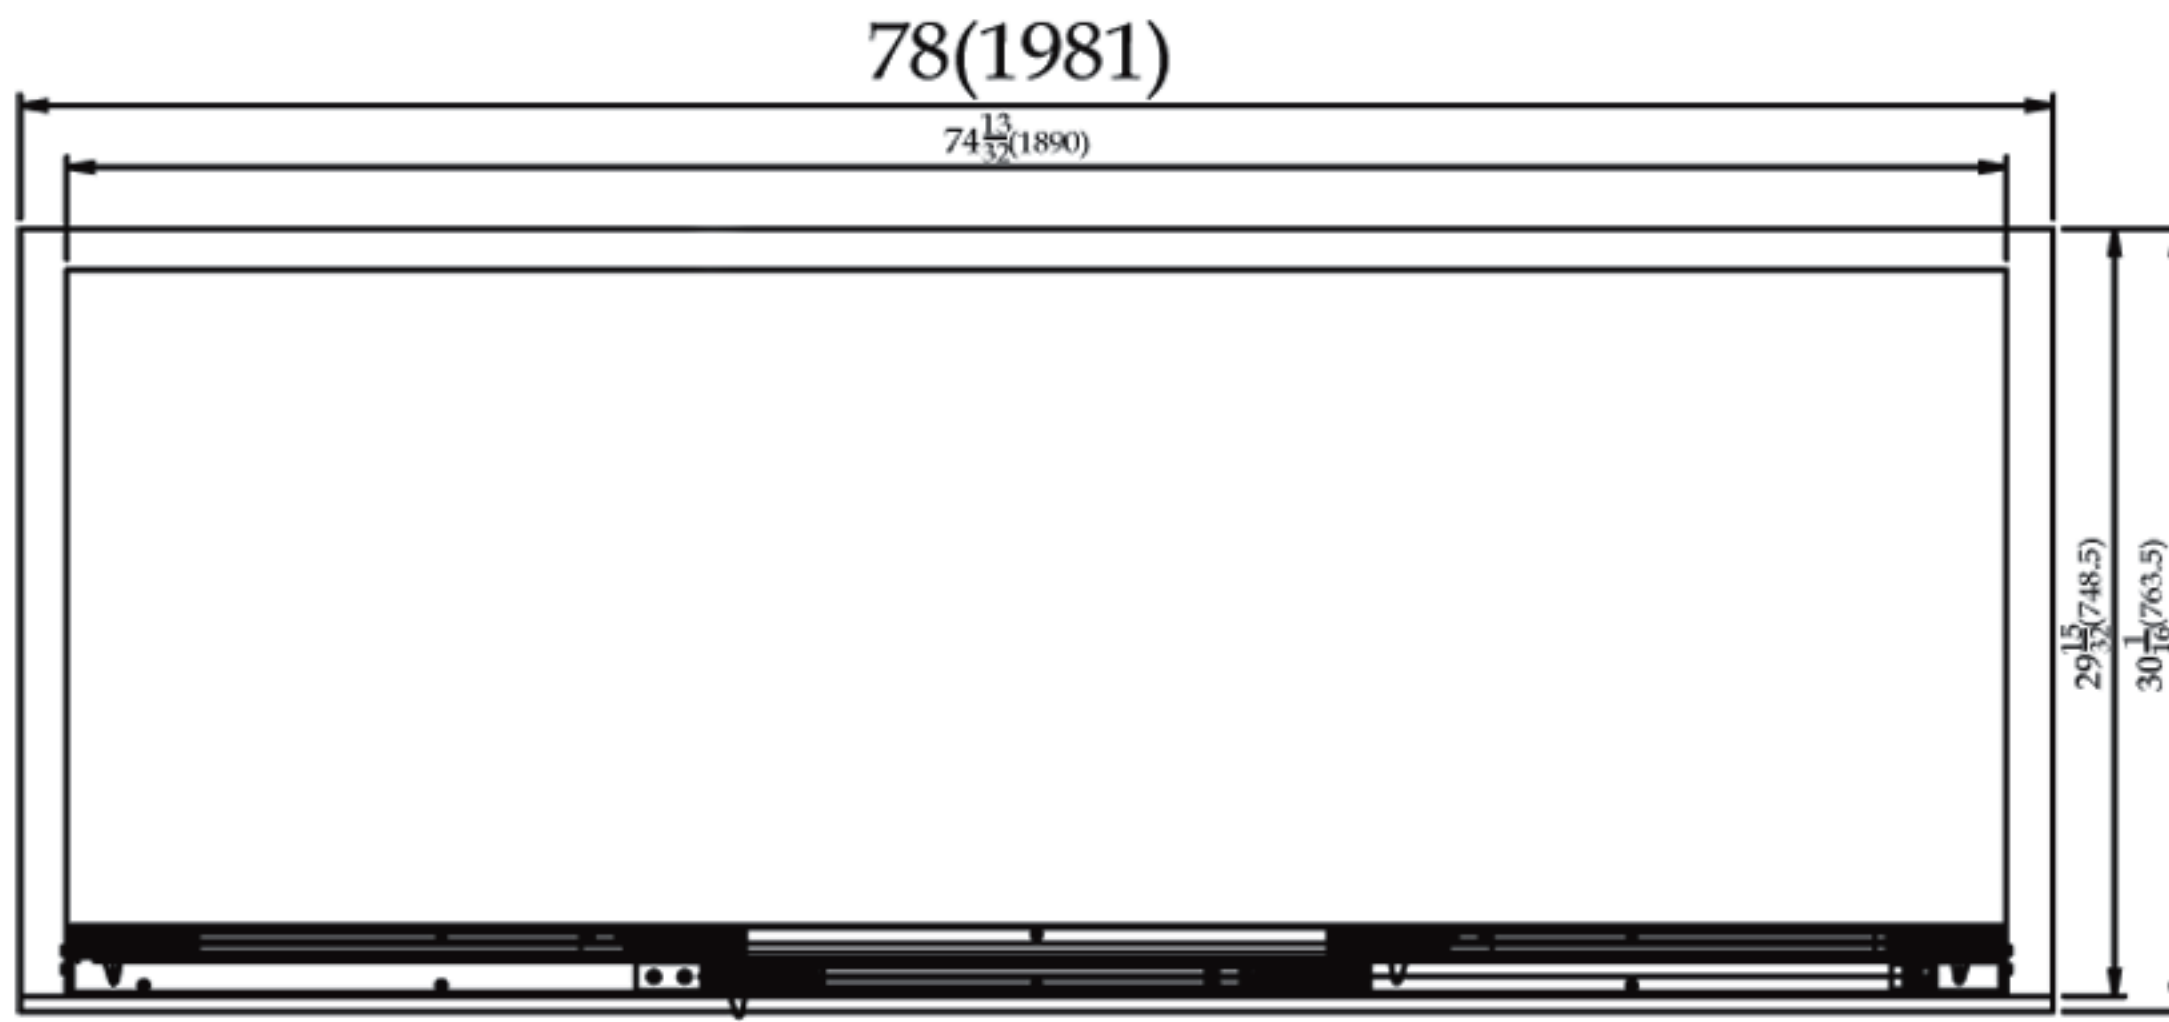

- White color cabinet.
- Black color frame on door.
- Double pane glass door with thermal film.
- Fully adjustable wire shelves with non-corrosive coating.

### \* Option

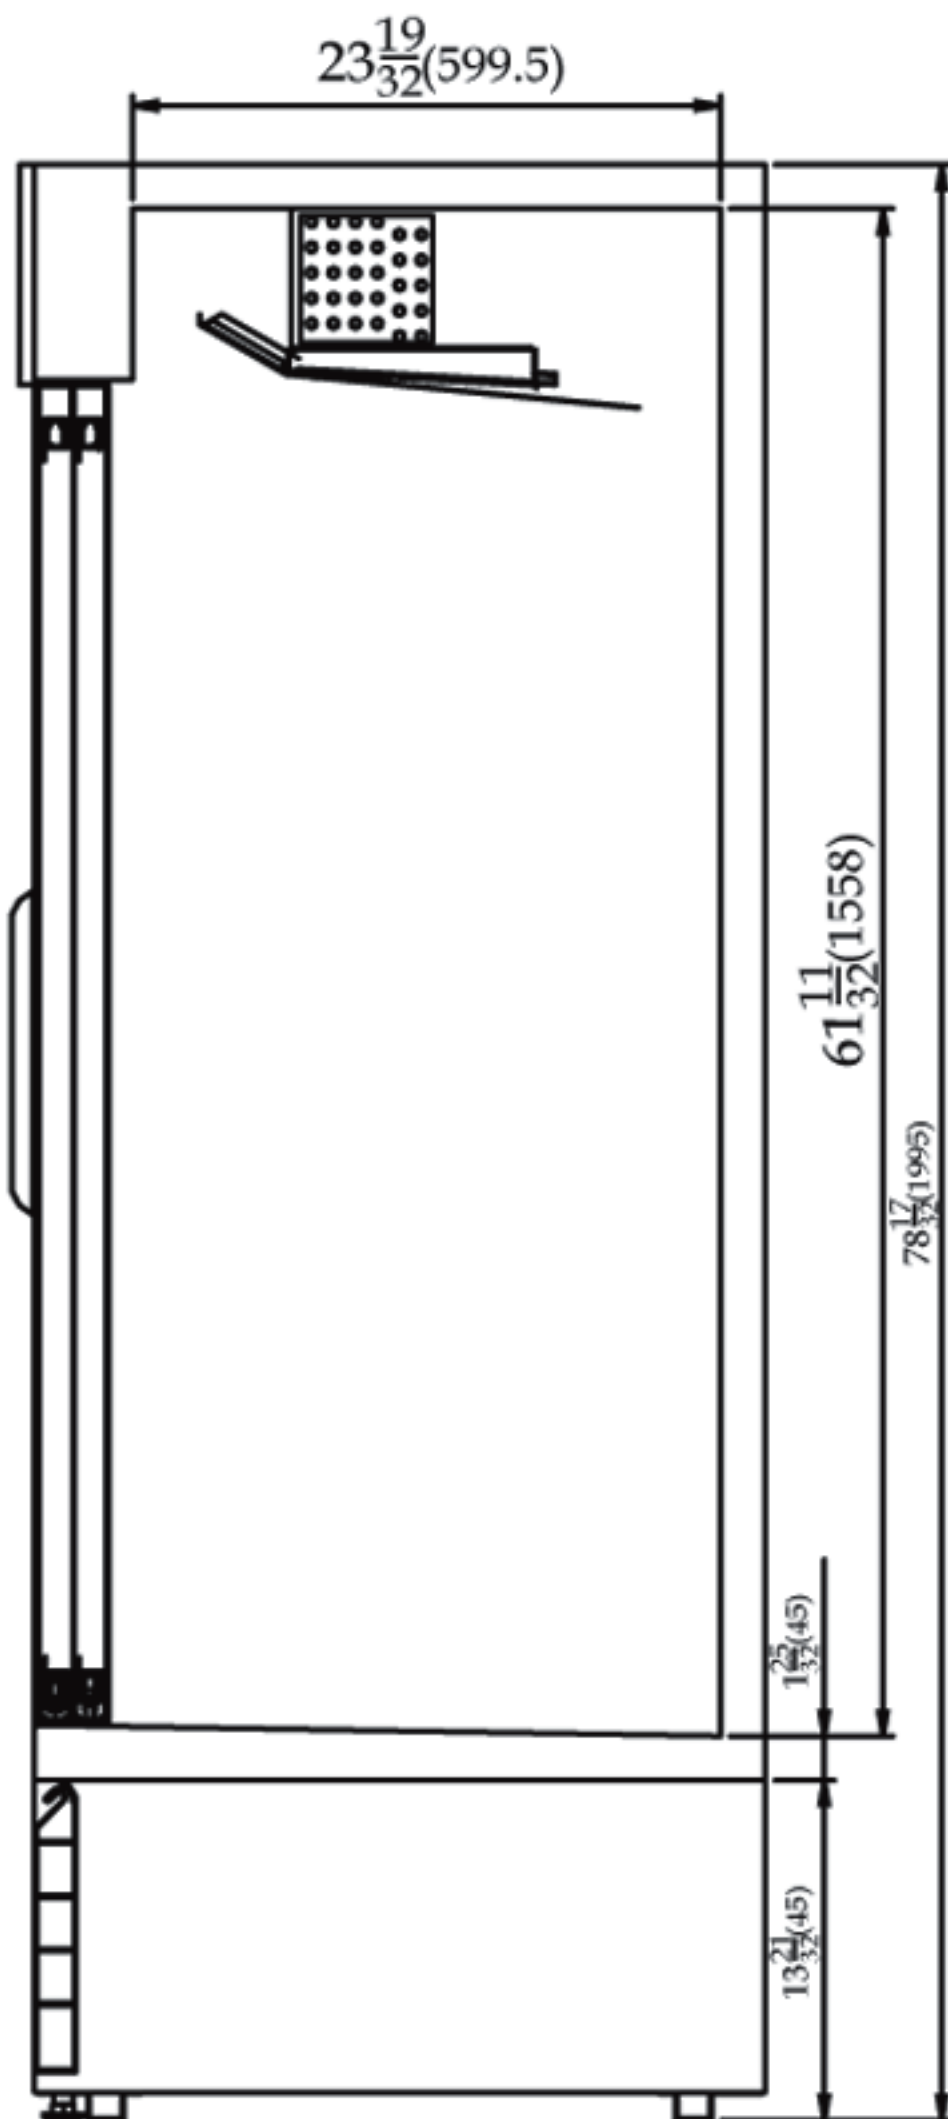

- Gravity feed merchandising racks.
- Customized graphics & color available in quantity

### \* Holds 33 F~38 F

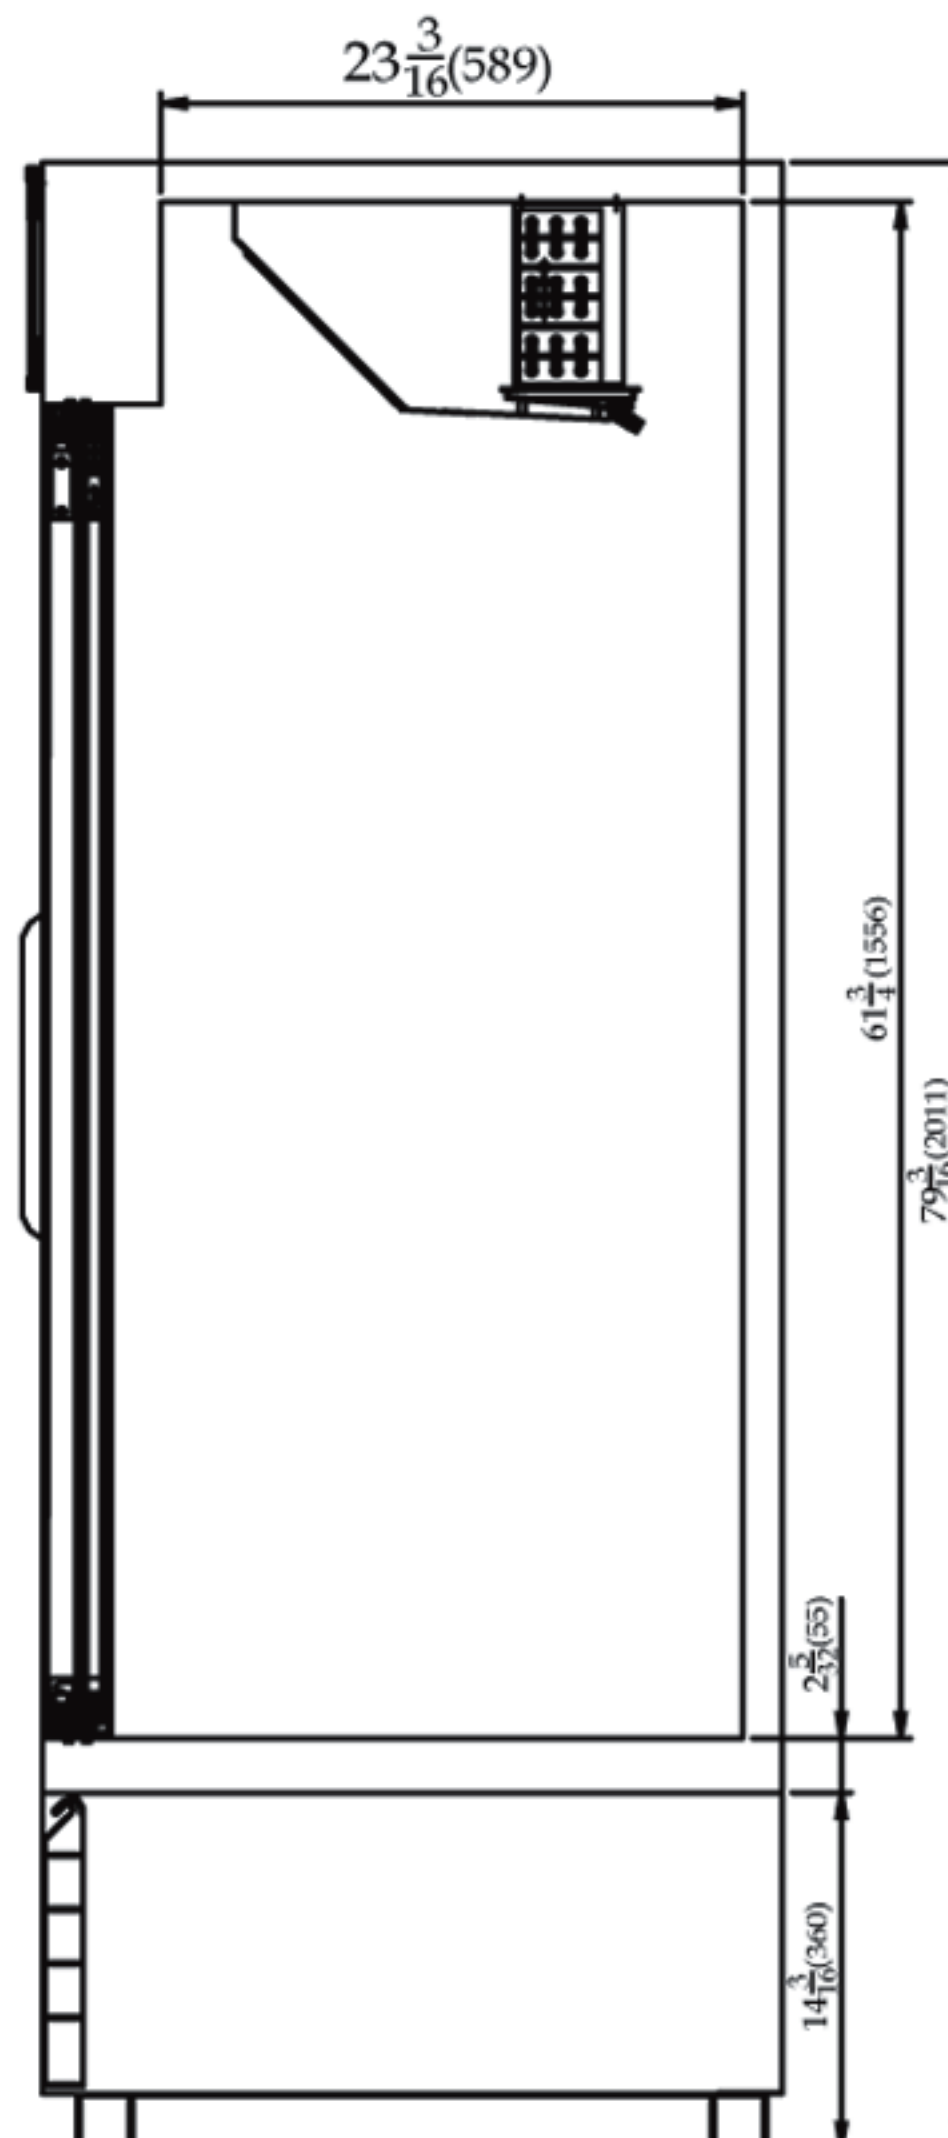

### \* Foamed with polyurethane, high-density cell insulation(CFC Free)
